Rotarians Hear Report Of Chicago Convention

Local Rotarins enjoyed a real treat on Monday when Phil Baker, associate Governor of District D37, Lions International, was the speaker.

Phil had attended the international Lions Convention in Chicago recently and just last week attended a Governor's Convention in Great Falls. He gave a very interesting account of his trip toand from Chicago and a few of the highlights of the Convention, one of which was attending a double header in the big league baseall games. To see one of these games had been an ambition of Phil for a along time and he said he really enjoyed it. They had a four hour boat ride on Lake Michigan in the evening and this was very enjoyable and a real thrill.

Returning home they spent a day in St. Paul and visited stores, business houses and so on. All along the way the crops were fine except the ride from Taber to Swift Current where crops were dry. Phil said the first site of the trip was to get on to Taber and Barnwell and see the gardens, beet fields and waving grain the effects of irrigation, and now, more than ever before he said, he was going to press the senior government at Ottawa to enlarge our present irrigation systems to make the desert in the south-east in part of Alberta "blossom as the rose."

The speaker was given a hearty round of applause by the Rotes as an appreciation for his interesting and instructive talk.

Mrs. Boyson left for Vulcan on Sunday's bus where she has accepted a special case of nursing for a few weeks.

* * *

Junior Fairbanks, Jim May and Doc Rolfson left by bus Sunday for Calgary to see the recruiting officers Jimmy and Junior are trying to make the Navy.

Thanksgiving Day

The ninth of October, 1944, has been appointed Thanksgiving Day by Proclamation in the Canada Gazette. In quaint words the proclamation says: "We therefore considering that these blessings vouchsafed to the people of our Dominion of Canada do call for solemn and while acknowledgement have thought fit, by and with the advice of Our Privy Council for Canada, to appoint, and We do appoint Monday the ninth day of October next as a day of general thanksgiving to Almighty God for the blessings with which the people of Our Dominion of Canada have been favoured during this year and We do hereby invite all Our people of Canada to observe the said day as a day of general thanksgiving."

J. Orvin Hicken

Who along with being principal of the Public School and Bishop of the 1st Ward has a Sun Life agency and last year made the MacCanlay Club of that company with an aggregate of sales of over $125,000.00. Up until travel restrictions, the Company gave the winners in this Club a banquet and holiday trip in appreciation of their efforts. Today they usually have been in Calgary for a day or two for a get together.

We congratulate our fellow townsman on his accomplishment in making this Club.

Wedding Bells

Wednesday was wedding day for three Raymond couple, all of which ceremonies were performed in the Alberta Temple with Pres. Edw. J. Wood officiating. Reatives of all parties were present to witness the ceremonies and the newlyweds received the greetings and well wishes of their many friends.

Miss Mildred McBride and Grant Fawns of the R.C.A.F. were married and a wedding supper was served at the McBride home in the evening when sixteen relatives and immediate friends gathered to partake of the splendid supper served. The young couple are enjoying a honeymoon here before Grant returns to training and will probably make their home wherever he is stationed.

Miss Alyce Peterson of Regina, and P.O. Thurston Smith who has just returned from overseas were united in marriage and a wedding reception is being planned for the week end. Thurston is to report back to Calgary for instruction work the 18 of this month and the young couple will likely make their home there.

Miss Margaret Dahl and Gerald Leishman, son of Mr. and Mrs. Wm. Leishman of Magrath were also married and a dinner was served at the Howard Oliver home Wednesday afternoon for the relatives of the two young people. The groom is a member of the R.C.A.F. and Margaret has been teaching in Henderson Business College in Calgary. They will probably make their home in Calgary.

We extend our heartiest congratulations and best wishes for the happiness and success of all of these fine young people.

Buy War Savings Certificates

Irrigate! Irrigate! Irrigate!

Have you noticed that two beets in our window? These are not put there particularly to show size, but to show type. They are a good average beet and J. W. Evans said an acre of beets like these with a 90 p.c. stand in the field would yield about 90 tons. Wouldn't that be a lovely harvest for any grower?

Right now beets need a great deal of water. With the ground so dry, the only means of giving your crop this moisture is to irrigate, and Company officials are urging growers to use water plentifully, not enough of course to harm the beets, but enough to keep the land damp and in a condition that beets can reach moisture all the time with their roots and spread out as far as their growth will allow.

This is the time when weight is put on fast and when the sugar content is increased. To allow fields to become dry now is to sacrifice much of the profit on the beet crop. The work, except harvesting and irrigating is now all done, and every additional ton in the field between now and digging is clear profit.

Don't spoil your beets, but they will absorb a lot of water these days and all for the making of a better beet harvest.

Improvements At Factory Yards

The past few months have witnessed quite a program of change and improvement at the beet yards at the Sugar Factory which it is hoped will facilitate handling of the big beet crop and prevent any loss from wilted or slightly damaged beets.

The spur tracks have all been taken up and new ones and additional ones installed to increase the amount of car space in the yards and speed up unloading. A new hopper has been built at the east end of the yards where beets brought in by truck can be dumped and sent immediately into the flumes for processing. The pulp silo has been increased appreciably in capacity by raising the wall about five feet, which spread around the entire circumference of the silo means room for many thousands additional tons of pulp. These changes have kept quite a crew of men busy through out the summer and they are just being completed now so that every thing will be ready for the start of the campaign.

On the lot near the molasses tanks they are erecting a new material storage warehouse. This building is for the storage of bulk materials that are shipped in and held for future use. The building is 112 feet long, 32 feet wide and is of brick and steel construction, with the new glass brick windows. It will cost in the neighborhood of $65,000 when completed.

Beet digging is expected to commence about next Wednesday, and if weather is favorable slicing will probably start about Friday or Saturday. If fieldmen's estimates are correct the beet crop will average twelve tons per acre on 30,000 acres, or roughly 360,000 tons of beets to be processed. There was a good average tonnage last year, but considerable spoilage occurred between harvest and the processing which cut down the total sugar output considerably. It is hoped that with the improved facilities for handling the beets that this will be entirely overcome and every ton of beets harvested will find its way to the knives.

Local Sugar Factory officials were in Picture Butte on Thursday giving the Factory there the once over before the start of sugar making campaign.

NEWS NOTES

Robt. Salmon of the R.C.A.F. who has spent several months at the Coast was home on leave over the week-end.

* * *

Elder S. B. Smith returned home Friday evening of last week after six months spent in the Western Canadian Mission mostly at Saskatoon. He is looking fine and like all missionaries had a most enjoyable and busy time while away.

* * *

H. S. Allen, pioneer business man of Southern Alberta since 1887 when he established a store in Cardston, is bedfast at his home in Raymond and is gradually growing weaker. His many friends extend their best wishes to him.

* * *

Elder Sidney B. Smith, recently returned from the Western Canadian Mission, and his son P.O. Thurston Smith who is home afeter 22 months overseas, were speakers at the 2nd Ward last Sunday evening and gave interesting talks to a large congregation. A good musical program was also given.

Teddy Brewerton is returning to his R.C.A.F. training on Monday after a two week's leave, one of which was spent with relatives in the States.

JOE CITIZEN SAYS —

These settlers from across the sea who came here so's they could be free to live their lives without the fear of death and danger lurking near who've built their homes beneath these skies where no unfriendly ship o're flies, and send their children day by day to school to learn to work and play;—they must by this time understand the many blessings of this land, where folks from countries near and far, with neither race nor creed a bar, can freely come and freely go and count on reaping as they sow.

I hope they fully realize that all these freedoms that they prize are really what have been at stake throughout the war and so will take their utmost dollar and respond when asked to buy another bond.

They Take Care Of Oscar

"Share the Wealth" has returned to the air for its sixth season. The two main reasons are shown working in perfect harmony, as usual, with the microphone getting all ready for another chuckle. On the left, chubby, versatile, dapper master of ceremonies, Stan Francis, who hands out the money, on the right, debonair, handsome, smooth-selling purveyer of smiles, Cy Mack, who gives the presents away. "Share the Wealth" is heard on Saturday nights at 7:30 from Toronto to the Eastern and Midwest Network of the CBC.

$1,300,000,000.00 New Victory Loan

OTTAWA. Sept. 11—Finance Minister Ilsley gave Canadians a new high target of $1,300,000,000 for the Seventh Victory Loan campaign which, he announced, will open Oct. 23rd when he made an official announcement last night.

The $1,300,000,0000 figure, which he described as the "minimum ob objective" is $100,000.000 above the objective of the Sixth Victory Loan which last May yielded $1,407,547,650

In his announcement Mr. Ilsley said the borrowing for the requirements for current fiscal year stood at the 3,200,000,000 figure estimated in his budget speech June 26. Provision had been made in the budget for uncertainties and it appeared likely that an increase of 500,000,000 might have to be made in estimates of war expenditures.

Individual subscriptions have an objective of 600,000,000 in the October campaign, a $75 000,000 increase over objective in the Sixth Loan.

In his budget speech Mr. Ilsley placed the cash requirements of the Dominion at $6,000,000,000 for 1944-45, an increase of $200,000.000 compared with the previous year. In his announcement he recalled that he had said expenditures for Canadian forces in Europe could not be accurtely estimated and it was "probable" that war expenditures would have to be increased by about $500,000,000.

Achievement of the objective announced by Mr. Ilsley would bring Canada's borrowing in nine loans to a total of $8.456,17,750. The eight previous loans, with steadily mounting totals have yielded $7,156,1'8,750 excluding conversions.

Hon. Solon Low Gives Up Both Cabinet Portfolios

Edmonton, Sept. 12— Premier E. C. Manning of Alberta today announced that Solon E. Low, national leader of the Social Credit Association of Canda, had been relieved of his two portfolios in the provincial cabinet in order to devote more time to organization of the national party. He said, however, Mr. Low would continue without portfolio.

Mr. Manning said R. E. Ansley, member of the legislature for Leduc, had succeeded Mr. Low as minister of education and he had himself given up the trades and industry portfolio to become provincial treasurer.

The premier said C. E. Gerhart, minister of municipal affairs, had assumed the duties of minister of trades and industry.

CARDSTON PIONEER PASSES

James C. Cahoon of Cardston, father of Mrs. Lowell Court, passed away at his home about noon Wednesday after more than a year of suffering. We extend to Thelma and the family in their sorrow our deepest sympathy.

In the early days of Raymond, deceased who was a contractor and builder assisted in the building of a number of Raymond's buildings, which still stand as a monument to his thoroughness.

Killed In Action

Word was received by the Wm. Burrows family Thursday morning informing that their son and brother Francis, of the Canadian Active Army in France was killed in action on August 23rd.

No details were given in the telegram. We express our deepest sympathy to the family in their sorrow.

Ronald Watson Wounded

Hawkins who is with the Canadian Army in France was wounded in the French invasion on August 26, according to information received by his mother.

He was with a machine gun nest, and every man in the nest was wounded but none killed. Ronald was hit nine times and two bullets one in his calf and one in his shoulder required an operation. Roun Mitchell another local man was in the detail which rescued the wounded men from the machine gun nest and when he and his men arrived Ronald was dressing the wounds of his comrades, but passed out soon after the arrival of assistance.

In his letter to his mother he told her he was getting along fine and improving steadily. He didn't think his injures were serious enough to rate a trip home which he said would have been the only good luck in the bad luck of the day.

New Hospital Covered In

The last two weeks have witnessed rapid progress on the local Municipal Hospital. Some delay was experienced in getting masons after the brick arrived, but the bricklaying was completed without delay when once started, and early this week the carpenters started putting the sheeting on the roof and it was all closed in Thursday morning and shingling was in progress on the west half of the roof.

The progress on this institution is watched anxiously by Raymond people in spite of its being ready for use before winter. It is not expected that there will be any great delay in delivery of materials. Some of the equipment is already in Calgary ready for shipment and with the easing of bans on various materials equipping the building will be easier.

Local organizations who assumed responsibility of raising cash for furnishings are making steady and maintained progress and are determined to do their full share to make the plan 100p.c. successful. This cooperation is certainly highly appreciated by the members of the Hospital Board.

WESTERN RESEARCH LABORATORY

The educational program conducted by the Line Elevators Companies urging intensified research into industrial utilization of surplus farm crops bore fruit on the last day of the session of Parliament which has just been brought to a close. Parliament voted an amount of $325,000.00 to build a research laboratory which will be erected at Saskatoon. The [illegible] will be divided into two [illegible]; first, into crops grown for food with a view to improving their processing, storage and transportation; and second, the finding of profitable industrial outlets for surpluses of products grown primarily for food.

In 1938 The North-West Line Elevators Association made a continent wide survey of the possibilities of scientific research expanding the demand, and thus enhancing the price of surplus farm products. In the fall of that year representatives of the Line Elevator Companies, at the initial meeting of the Chemurgic Committee of the Canadian Chamber of Commerce held at Toronto, urged the establishment of fully equipped research laboratories in Western Canada, dedicated to finding new industrial and edible uses for surplus products. This was followed by an educational campaign extending over the past six years in which the Line Elevator Companies enlisted the whole-hearted co-operation of the weekly and daily press of Canada, Farm organizations and all political parties joined in the advocacy of enlisting the support of science aiding the Prairies in finding expanded uses for farm products in properly equipped laboratories.

In 1938 several hundreds of million bushels of grain have been used for industrial purposes, particularly in the manufacture of alcohol for war purposes. This was done in spite of sceptics warning that manufacture of alcohol from wheat was not feasible. Industrial utilization of surplus grain did much to remove the burdensome surpluses—the consumption of which enabled the price of wheat and other grains to move upward. In addition one of the large flour milling companies has established a starch and gluten plant for the manufacture of these products from wheat at the Head of the Great Lakes and a similar project is about to be launched at Moose Jaw.

The Line Elevator Companies are to be congratulated on the successful outcome of their plans to seek intensified research and expanded markets for agricultural products. The industrial use of surplus grains in the manfacture of alcohol in Canada and the United States has not only aided our war effort but has also brought additional millions of dollars of wealth to Western farmers through profitable sale of surplus wheat. The expansion of research should assist further in the search for a profitable post-war agricultural era in Western Canada.

NEWS NOTES

Miss Beryl Copithorne of Calgary is a house guest this week of Mrs. Booth Card.

Pres. and Mrs. A. D. Palmer and Bishop C. Frank Steele of Lethbridge were Raymond visitors Tuesday.

High winds prevailed over the district Wednesday and Thursday and the weather was considerably cooler

R. Byron Vance, LeRoy Gallup and Karl Lebbert, all of Rosemary, who attended a M.L.A. Convention in Lethbridge on Saturday came on to Raymond and spent Sunday and Monday on business and pleasure. They returned home on Tuesday.

Jas. Weaver, R.C.A.F stationed at Lethbridge was home Sunday and Monday on leave.

Bishop and Mrs. J. Ross Salmon of Picture Butte, were Raymond visitors Tuesday and Wednesday.

Bud Palmer of the R.C.A.F. stationed at No. 8 B and G. Lethbridge was home on leave over the week end.

Stoker Paul Woolley, who has been on a month's leave at home is leaving on Sunday to report back to Halifax, N.S. on Sept. 22nd.

After slightly more than 3 years in Claresholm at the Airport there, Lloyd Kitchen, son of Mr. and Mrs I. Kitchen returned last week after a two weeks furlough at home and has been stationed at Lachine, Que., for further commando training and then he hopes a trip across the pond.

THOMPSON BOYS LEAVING

Henry and James Thomson who have farmed for many years in the Welling district, are selling their holdings there and are going to move to the Creston Valley district of British Columbia.

They have made arrangements to purchase quite a sizeable acreage of the Kootenay River dyked land in that district, and are buying homes in the Canyon settlement. They plan on taking all their farming equipment with them to their new location.

No definite disposal of their property here has been made as yet but several prospective buyers are negotiating for it at good prices. Welling district will lose two valuable families in the departure of these people and we are sure they join with us in wishing them success and happiness in their new location.

Victorious Canadians enter Berlin . . .

Every Canadian looks forward to that headline. Every Canadian believes that some day soon a great victorious convoy will thunder down the road to Berlin. Huge Canadian trucks . . . Canada's crack battle equipment, and gallant Canadian soldiers, world's finest fighting men, will all be there.

Will you be with them on the road? . . . or at least, on the way?

The smashing defeats we must inflict upon the enemy before that day, however, cannot be won except by fierce, determined fighting . . . and the First Canadian Army, you may be sure, will help to deal the hammer blows that punch the way along the Berlin road.

That's why Canada's Army needs men and needs them NOW!

Join for General Service TODAY!

When Peace has come, you'll be proud to know (and know that the world knows) you had your place in the mighty force that fought its way to final VICTORY.

VOLUNTEER TO-DAY

WEEKLY LETTER

SELECTION OF BREEDING SHEEP

The time is rapidly approaching when lambs will be going to market in large volume and at that time ewe lambs for replacement in the breeding flock are selected. This selection is of utmost importance because on it will depend the quality of the ewe flocks in the years to come, consequently it behooves all sheep producers to pay particular attention to this phase of their operations. At the Lethbridge Station it is one of the most critical stages in the breeding program.

It has been stressed before that, generally speaking, insufficient time and attention is given to this work. To be fully effective it requires individual evaluation of each lamb. The simplest procedure is to get all the ewe lambs cut into a working pen, large enough to provide space so that the lambs can be examined properly. The first step then is to cull all the lambs that obviously are not up to standard on the basis of size and conformation. This point is not always given enough emphasis because, in marketing, the heavier lambs naturally bring greater returns and the tendency may well be to send them to market for this reason. Nevertheless the smaller lambs are the poorest doers as a rule twins excepted, and cannot be expected to be mothers that in turn will produce big, strong lambs.

After the obvious culls have been removed the selection of the best individuals should take place. The degree of this selection will be limited by the proportion of the ewe lambs that must be kept to maintain the size of the flock. In this selection attention is given not only to body side and conformation, but to wool quality, staple length, and density, and other characteristics such as face cover and wrinkling. Fleece characteristics can be determined on individual handling of the lambs and while this may appear to be a good deal of work it is well worth while.

Leading breeders of any class of livestock are noted for the care that they give to selecting their breeding stock. By doing this they have been able to build up their herds to a high standard. This same principle applies to commercial breeding as well for the quality of the product sold depends on the quality and producing ability of the parent breeding stock. Small animals with poor constitution and poor conformation cannot be expected to produce high class marketable animals. While the statement often is made that the sire is half the flock the fact remains that in any individual mating the dam is just as important.

DR. K. W. NEATBY
Director
Line Elevators Farm Service
Winnipeg, Manitoba

False Loose Smut of Barley

Last June, we published a description of "a third barley smut," and we appealed to grain buyers, members of junior farm clubs and others to send in, for identification, specimens of what looked like loose smut.

The response to our appeal was fairly good, and we are very grateful to those from whom specimens were received. Of 591 specimens, 410 proved to be ordinary loose smut, and 181 were false loose smut.

False loose smut becomes less and less common from East to West. Of 146 Manitoba specimens, 66 (44%) were false loose; of 295 Saskatchewan specimens, 95 (32%) were false loose; and in Alberta, 20 (13%) out of a total of 150 proved to be false loose smut. This can be explained, at least in part, by the fact that the practice of seed treatment increases from East to West. False loose smut can be controlled by ordinary methods of seed treatment; but ordinary loose smut cannot. 86% of all Alberta specimens, 70% of all Saskatchewan specimens and only 47% of all Manitoba specimens were derived from treated seed. In other words, it looks as though Alberta may be keeping false loose smut down by seed treatment.

It is also significant that of 85 Newal specimens, only nine were false loose smut. Newal is concentrated in Alberta. Of 99 Plush specimens, 49 were false loose smut. Plush is concentrated in Manitoba.

Due to the limited quantity of material, the above remarks must be regarded as suggestions rather than conclusions.

about the things you buy in wartime

When you go to a store to buy and can't get the things you want, remember that war upsets the whole machinery of production and supply. This is true not only in Canada but throughout the whole world.

As Canada is devoting over half her production making things for war it is inevitable that civilian supply must be reduced.

We just can't produce all the things required to fill the greatly increased civilian demands, but production efforts are being directed to see that the best use is made of materials and labour that are available for the production of civilian goods.

Remember these facts when you have difficulties in your shopping.

Chairman
Wartime Prices & Trade Board

THE STORY OF CHILDREN'S UNDERWEAR

OBVIOUSLY babies and children must have underwear. So—the Wartime Prices and Trade Board has given special attention to the production of these garments.

The problem has not been so much one of a lack of raw materials, but of getting the raw materials (wool, cotton, rayon), spun into yarns—and then knit into garments. Canada has never produced all the wool, cotton and rayon yarn she requires. We have always had to get a substantial part of our requirements from other countries, even in peacetime. But since the war, there has been an acute shortage of underwear yarns everywhere.

There has been a greatly increased demand in addition to production difficulties. The efforts of the Board to meet the problem are given below.

THE INCREASED DEMAND RESULTED FROM:

More babies . . . it's apparently always the way in wartime.

Reduced use of second-hand or "hand-me-down" garments.

Extra buying . . . Perhaps too many people wanted to be "on the safe side."

Increased consumer buying . . . More people with more money.

Less home sewing . . . Mothers have been working outside the home.

Huge demand for underwear by Armed Forces.

MORE UNDERWEAR: but still not enough!

The reason is that it just has not been possible to produce with the skilled workers and machines available to the United Nations enough yarn and garments to meet the increased demands all over the world.

WHAT HAS BEEN DONE ABOUT IT

✓First of all the Board found out the kind and quantity of garments Canadian children must have.

✓This showed that the public is asking for more than is actually needed.

✓So plans were made to see, by directing production all down the line, if we could meet the swollen demand as nearly as possible.

✓Each manufacturer was told to produce an increased number of garments.

✓A constant check is kept on mills to see that they are producing the required number.

✓Manufacturers not previously making children's underwear were induced to go into its production. An additional 600,000 garments will be provided this year from these sources.

✓Negotiations were conducted with production authorities in other countries for supplies of yarn to Canadian knitters for use in children's underwear.

✓Primary cotton mills were required to divert spinning facilities from fabric manufacture to the spinning of underwear yarns.

✓Arrangements were made through National Selective Service to direct more labour to the underwear mills.

✓A special campaign was launched to enlist parttime workers.

✓Distribution to retail stores was organized to ensure equitable supply to all areas.

The greatly increased supply of children's underwear resulting from these efforts is shown by the relative sizes of the figures below.

You can't get all you want in wartime

E. E. Jensen was a business visitor in Blairmore on Wednesday.

* * *

Mrs. Alex Nemeth and the two Nemeth boys are in Ohio visiting with their sister Mrs. Wm. Lacelle who has been living there for some years past.

* * *

A big lineman walked into the Navy recruiting station and told he wanted to enlist.

"What are the qualifications?" the officer asked.

"What?" asked the would-be sailor.

"Your qualifications. Are you a machinist, plumber, radio operator etc."

"No. But don't you have any vacancies for fighting men? He was accepted.

Working for the Benefit and Convenience of You

Jas. S. Weaver of the No. 5 B & G School at Lethbridge was home Wednesday afternoon.

* * *

A man was giving some advice to his son. At the end of a rather stern lecture, he said: "Now, my boy, you understand perfectly what I mean?"

"Yes," replied the boy, "what it boils down to is this: If I do well it's because of heredity, and if I fail it's my own fault."

HUMAN DRIFTWOOD

No system that is devised for public or private security will ever turn a lazy man into an industrious one, or a spendthrift into a provident individual. Hanging as a deadweight on all such schemes will be found those who will be active neither in their own affairs nor in the affairs of any other human driftwood on the great tide of life.

Now RUST TAKES A LICKING!

Good News for Every Farmer!

RUST robs the farmer of more than half the money he puts into farm machinery. For rust wears out farm machinery faster than actual use.

Marathon Rustproof Compound provides a sure way to stop losses due to rusting. It not only *prevents* rust formation, but it *penetrates* existing rust and *stops* further rusting. It "kills" rust, everyway!

And, Marathon Rustproof Compound is easily applied by brush or, when diluted with kerosene or painters' naphtha, by an ordinary insect spray gun. One application will prevent rusting for many months *longer* than any old-fashioned method.

Save the time, trouble and expense of delays caused by rust, this new, easy, inexpensive way. Save the labor of sharpening rusty cutter-bar knives; avoid the irritating work of trying to get rusty plows and cultivators to scour properly. Save money and metal all around the farm, every day, with Marathon Rustproof Compound.

Get in touch with us right away. Stop *Rust* costing *you* money!

FIGHTS RUST 3 WAYS TO MAKE 4 BIG SAVINGS

Marathon Rustproof Compound is New

1. It prevents rust formation.
2. It penetrates rust and stops further rusting.
3. It loosens rust so that it is removed easily.
4. It saves time, labor, money and metal.
